

# Vulnerability Assessment

## Manage the vulnerabilities exposing your mission-critical assets

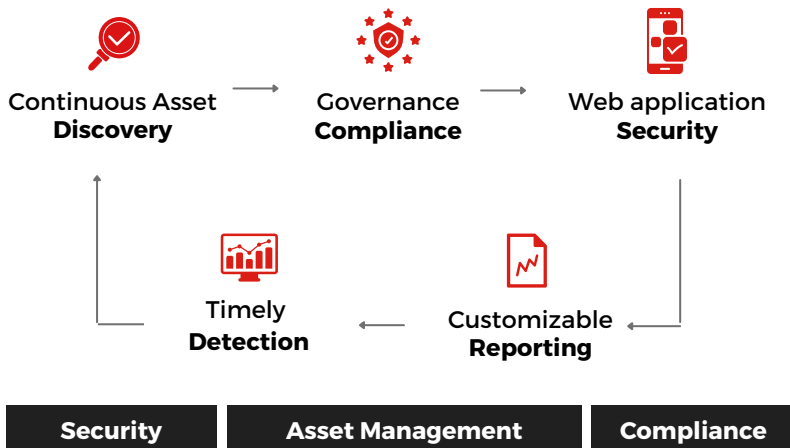

In today's fast-paced, technology-dependent business world, early detection of cybersecurity loopholes is significant for organisations to prevent cyber attacks and identify immediate solutions.

HGC Vulnerability Assessment Solution empowers enterprises to proactively identify, analyse, evaluate and report vulnerabilities in IT systems and the software which runs on the IT infrastructure.

## Features

- Highly accurate internal and external vulnerability scanning
- Support physical, cloud and virtual infrastructure
- Dedicated vulnerability management support to provide expert guidance and support
- Flexible report and remediation workflow tools via on-demand portal

## The vulnerability scanning process

## Your Benefits

- Identify real, exploitable vulnerabilities
- Satisfy regulatory compliance requirements
- Timely detection of network vulnerabilities
- 24x7 expert support by certified security analysts

## Keeping your online presence secure with 360° security protection
